

Monitoring two power supplies in redundant operation.

AL24-48 UNDER AND OVER VOLTAGE ALARM

2 channel alarm for use from 18 VDC to 64 VDC

- Large adjustment for use on both 24 VDC and 48 VDC.
- Contains two window comparator circuits, isolated from each other. Each has an isolated alarm contact.
- Monitors the output voltages of two power supplies.
- Between the levels of under and over voltage a green LED lights up and an alarm contact closes.

Specifications

Alarm circuits	
Undervoltage range	18 - 48 V
Overvoltage range	24 - 64 V
Isolation between circuits	500 V
Alarm contact, gold, rating	100 mA / 30 V, Normally Closed
Ambient temperature	- 20 to + 70 °C
